Protection Mats **TAPPETI DI PROTEZIONE**

I tappeti di protezione sono tutti Made in Italy. Il materiale ha una densità di 800 gr per metro quadrato ed è gommato sulla parte interna per evitare scivolamenti. E' completamente lavabile e serve a prevenire graffi o macchie sui piani di lavoro dei sollevatori o banchi per officina. Oltre a proteggere dal graffi e macchie evita il rimbalzamento di eventuali parti metalliche come viti, dadi ecc. che altrimenti cadrebbero fuori dal piano di lavoro con il rischio di perderle. Il materiale ha una notevole capacità di assorbimento di liquidi e fluidi. All'esterno una bordatura previene l'usura e le lacerazioni che con il tempo si potrebbero formare. I tappeti sono stampati con il logo Bike Lift ma su richiesta possono essere personalizzati con quantitativi minimi d'ordine. Prodotto con feltro 100% poliestere, combustibile ma non infiammabile, da veli cardati e legati meccanicamente mediante aghi ed abbinato a gomma base lattice naturale al 100%.

The protection mats are all Made in Italy. The material has a density of 800gr per square meter and is rubber-coated in the bottom side for anti-skid purposes. It is 100% washable and protects against scratches and spots over tabletops of lifts and workbenches. In addition to that, it prevents metallic parts like screws or bolts that may get lost, from falling off the lift or workbench tabletop. The material has a considerable absorbing capacity for liquids and fluids. The mat edges are seamed so as to avoid any wear or tear during usage. The mats are printed with the Bike Lift logo and can be customized upon request (MOQ's to be agreed). Made of 100% polyester felt, combustible but not flammable, from carded and strapped layers mechanically knitted and bound with 100% natural latex base rubber.
